

# Let's Get Started!

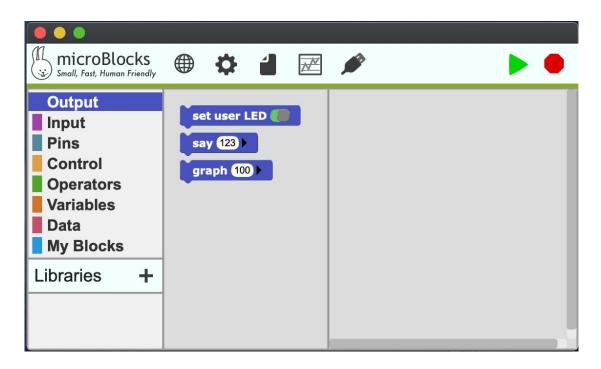

## **MicroBlocks | Getting Started**

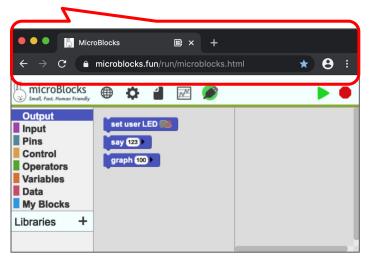

Download and install MicroBlocks for free! https://microblocks.fun/download (or see step 1\*)

A **browser version** is available for Chrome and Edge browsers.

https://microblocks.fun/run/microblocks.html

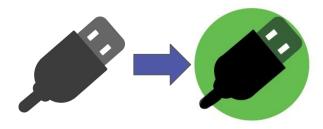

## MicroBlocks | Getting Started

Connect the micro:bit to your computer with a USB cable.

If the micro:bit is already loaded with the MicroBlocks firmware, a green circle will automatically appear, showing that the micro:bit is connected (skip to step 5). If not, go to step 3.

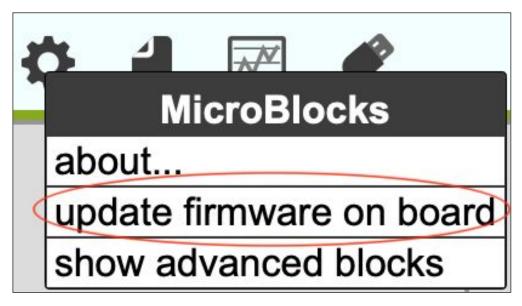

\* In the browser version click the above USB icon, select "BBC micro:bit", then click connect.

### MicroBlocks | Connect to Board

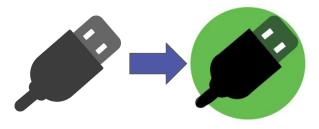

To install the firmware (first use only) open MicroBlocks, click the gear icon, and select "update firmware on board".

A green circle will automatically appear, showing that the micro:bit is connected.

\* In the browser version click the above USB icon, select "BBC micro:bit", then click connect.

## MicroBlocks | Left/Right Clicks

#### Left-click to select, change, drag/drop, and "run".

## MicroBlocks | Script, Test, Go!

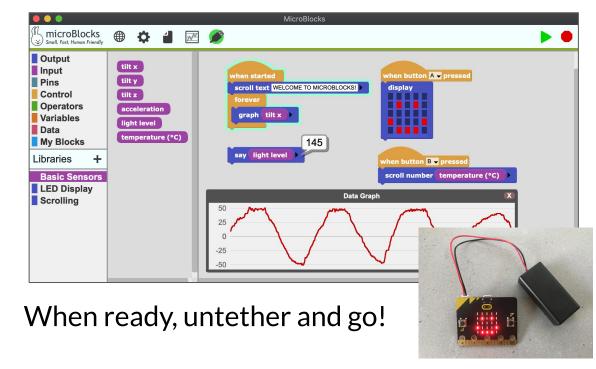

#### Import libraries and try out example scripts.

| Libraries + LED Display  |  |   |   |   | File   |      |
